Due to changes in Mercury propellers, the propeller sizing may be less than accurate. Please verify wide open throttle (WOT) RPM when using this chart.

WOT RPM should be at the top of the recommended speed range with the boat in a light load condition. Light load condition is considered 1/2 fuel, 2 people, and Coast Guard equipment.

Gear ratios are for low altitude applications. Prop sizes listed are for US applications (Canada & Int'l diameters/pitches may be different).

**PROPELLER & SPEED CHARTS**

Listed below is performance data on Sea Ray® models with power options. Speeds and prop selection have been arrived at after testing on boats with two people, a half tank of fuel, and clean bottom conditions. These estimated speeds will change with variances in altitude, temperature, and load conditions. This document is for internal Sea Ray use only and should not be disseminated outside the company. Under no circumstances should this information be quoted or distributed to existing or potential Sea Ray boat owners.

Due to changes in Mercury® propellers, the propeller sizing may be less than accurate. Please verify wide open throttle (WOT) RPM when using this chart. WOT RPM should be at the top of the recommended RPM range with the boat in a light load condition. Light load can be considered 1/2 fuel, 2 people, and Coast Guard equipment.

Gear ratios are for low altitude applications. Prop sizes listed are for US applications (Canada & Intl diameters/pitches may be different).

Listed below is performance data on Sea Ray® models with power options. Speeds and prop selection have been arrived at after testing on boats with two people, a half tank of fuel, and clean bottom conditions. These estimated speeds will change with variances in altitude, temperature, and load conditions. This document is for internal Sea Ray use only and should not be disseminated outside the company. Under no circumstances should this information be quoted or distributed to existing or potential Sea Ray boat owners.

Due to changes in Mercury® propellers, the propeller sizing may be less than accurate. Please verify wide open throttle (WOT) RPM when using this chart.

WOT RPM should be at the top of the recommended RPM range with the boat in a light load condition. Light load can be considered 1/2 fuel, 2 people, and Coast Guard equipment.

Gear ratios are for low altitude applications. Prop sizes listed are for US applications (Canada & Int'l diameters/pitches may be different).
- Mercury® FourStroke outboard offers reliability and fuel efficiency

Listed below is performance data on Sea Ray® models with power options. Speeds and prop selection have been arrived at after testing on boats with two people, a half tank of fuel, and clean bottom conditions. These estimated speeds will change with variances in altitude, temperature, and load conditions. This document is for internal Sea Ray use only and should not be disseminated outside the company. Under no circumstances should this information be quoted or distributed to existing or potential Sea Ray boat owners.

Due to changes in Mercury® propellers, the propeller sizing may be less than accurate. Please verify wide open throttle (WOT) RPM when using this chart. WOT RPM should be at the top of the recommended RPM range with the boat in a light load condition. Light load can be considered 1/2 fuel, 2 people, and Coast Guard equipment.

Due to changes in Mercury propellers, the propeller sizing may be less than accurate. Please verify wide open throttle (WOT) RPM range using this chart.
WOT RPM should be at the top of the recommended RPM range with the boat in a light load condition. Light load can be considered 1/2 fuel, 2 people, and Coast Guard equipment.
Gear ratios are for low altitude applications. Prop sizes listed are for US applications. (Canada & Int’l diameters/pitches may be different.)

### PROPELLER & SPEED CHARTS

Listed below is performance data on Sea Ray models with power options. Speeds and prop selection have been arrived at after testing on boats with two people, a half tank of fuel, and clean bottom conditions. These estimated speeds will change with variances in altitude, temperature and load conditions. This document is for internal Sea Ray use only and should not be disseminated outside the company.

Due to changes in Mercury® propellers, the propeller sizing may be less accurate. Please verify wide open throttle (WOT) RPM when using this chart. WOT RPM should be at the top of the recommended RPM range with the boat in a light load condition. Light load can be considered 1/2 fuel, 2 people, and Coast Guard equipment.

Due to changes in Mercury® propellers, the propeller sizing may be less than accurate. Please verify wide open throttle (WOT) RPM when using this chart. WOT RPM should be at the top of the recommended RPM range with the boat in a light load condition. Light load can be considered 1/2 fuel, 2 people, and Coast Guard equipment. Gear ratios are for low altitude applications. Prop sizes listed are for US applications (Canada & Int’l diameters/pitches may be different). Listed below are performance data on Sea Ray® models with power options. Speeds and prop selection have been arrived at after testing on boats with two people, a half tank of fuel, and clean bottom condition. These estimated speeds will change with variances in altitude, temperature, and load conditions. This document is for internal Sea Ray use only and should not be disseminated outside the company. Under no circumstances should this information be quoted or distributed to existing or potential Sea Ray boat owners.

**PROPELLER & SPEED CHARTS**

Listed below is performance data on Sea Ray® models with power options. Speeds and prop selection have been arrived at after testing on boats with two people, a half tank of fuel, and clean bottom conditions. These estimated speeds will change with variances in altitude, temperature and load conditions. This document is for internal Sea Ray use only and should not be disseminated outside the company. Under no circumstances should this information be quoted or distributed to existing or potential Sea Ray boat owners.

Due to changes in Mercury® propellers, the propeller sizing may be less than accurate. Please verify wide open throttle (WOT) RPM when using this chart. WOT RPM should be at the top of the recommended RPM range with the boat in a light load condition. Light load can be considered 1/2 fuel, 2 people, and Coast Guard equipment.

Propeller & Speed Charts

Listed below is performance data on Sea Ray® models with power options. Speeds and prop selection have been arrived at after testing on boats with two people, a half tank of fuel, and clean bottom conditions. These estimated speeds will change with variances in altitude, temperature and load conditions. This document is for internal Sea Ray use only and should not be disseminated outside the company.

Due to changes in Mercury® propellers, the propeller sizing may be less than accurate. Please verify wide open throttle (WOT) RPM when using this chart. WOT RPM should be at the top of the recommended RPM range with the boat in a light load condition. Light load can be considered 1/2 fuel, 2 people, and Coast Guard equipment.

PROPELLER & SPEED CHARTS

Listed below is performance data on Sea Ray models with power options. Speeds and prop selection have been arrived at after testing on boats with two people, a half tank of fuel, and clean bottom conditions. These estimated speeds will change with variances in altitude, temperature and load conditions. This document is for internal Sea Ray use only and should not be disseminated outside the company. Under no circumstances should this information be quoted or distributed to existing or potential Sea Ray boat owners.

WOT RPM should be at the top of the recommended RPM range with the boat in a light load condition. Light load can be considered 1/2 fuel, 2 people, and Coast Guard equipment.

Due to changes in Mercury propellers, the propeller sizing may be less than accurate. Please verify wide open throttle (WOT) RPM when using this chart. WOT RPM should be at the top of the recommended RPM range with the boat in a light load condition. Light load can be considered 1/2 fuel, 2 people, and Coast Guard equipment.

Gear ratios are for low altitude applications. Prop sizes listed are for US applications (Canada & Int’l diameters/pitches may be different).
• An expansive cockpit social zone has a well-appointed wet bar with refrigerator, sink and available dual grills while the innovative new transom patio wing opens to extend the cockpit all the way to the water.
• At the bow, a row of forward touring seats w/ arm rests and additional forward benches that surround a stylish bow table, which also converts into a sunpad.
• Premium Fusion® audio system w/ Bluetooth®, Apple AirPlay® & Digital Signal Processing
• Plenty of sun coverage via fiberglass hardtop w/optional aft extended sunshade & bow sail shade system.
• For overnighting, premium comforts extend to the cabin via a queen-sized bed in the aft section and a forward bunk that converts to form a social gathering area.
• Innovations, found throughout, include standard NAUTIC-ON™ Smart Boat System; Joystick Piloting and Dual Digital Dash w/ standard 16" Simrad Touchscreen displays

**Propeller & Speed Charts**

Listed below is performance data on Sea Ray models with power options. Speeds and prop selection have been arrived at after testing on boats with two people, a half tank of fuel, and clean bottom conditions. These estimated speeds will change with variances in altitude, temperature and load conditions. This document is for internal Sea Ray use only and should not be disseminated outside the company. Under no circumstances should this information be quoted or distributed to existing or potential Sea Ray boat owners.

Due to changes in Mercury propellers, the propeller sizing may be less than accurate. Please verify wide open throttle (WOT) RPM when using this chart. WOT RPM should be at the top of the recommended RPM range with the boat in a light load condition. Light load can be considered 1/2 fuel, 2 people, and Coast Guard equipment.

### Propeller & Speed Charts

Listed below is performance data on Sea Ray® models with power options. Speeds and prop selection have been arrived at after testing on boats with two people, a half tank of fuel, and clean bottom conditions. These estimated speeds will change with variances in altitude, temperature, and load conditions. This document is for internal Sea Ray use only and should not be disseminated outside the company. Under no circumstances should this information be quoted or distributed to existing or potential Sea Ray boat owners.

Due to changes in Mercury® propellers, the propeller sizing may be less than accurate. Please verify wide open throttle (WOT) RPM when using this chart. WOT RPM should be at the top of the recommended RPM range with the boat in a light load condition. Light load can be considered 1/2 fuel, 2 people, and Coast Guard equipment.

Listed below is performance data on Sea Ray® models with power options. Speeds and prop selection have been arrived at after testing on boats with two people, a half tank of fuel, and clean bottom conditions. These estimated speeds will change with variances in altitude, temperature and load conditions. This document is for internal Sea Ray use only and should not be disseminated outside the company. Under no circumstances should this information be quoted or distributed to existing or potential Sea Ray boat owners.

Due to changes in Mercury® propellers, the propeller sizing may be less than accurate. Please verify wide open throttle (WOT) RPM when using this chart. WOT RPM should be at the top of the recommended RPM range with the boat in a light load condition. Light load can be considered 1/2 fuel, 2 people, and Coast Guard equipment. Gear ratios are for low altitude applications. Prop sizes listed are for US applications (Canada & Int) diameters/pitches may be different.

QUIET RIDE™—The Science Behind the Silence

Quiet Ride is a system of technological advances exclusively available on select Sea Ray® boats that reduces Noise, Vibration and Harshness (NVH) by up to 50 percent. Conversations are easier, fatigue is reduced, concentration is enhanced. Here’s how Sea Ray did it.

**COMPOSITE LAMINATE**
A specially formulated inner laminate material is applied to the hull, deck and liner. This composite laminate converts the vibration energy into heat, which water whisks away.

**WIND FARING**
Sea Ray engineers fared metal windshield casings, softening edges and limiting the amount of surface area wind must cut when at speed.

**INSULATED ENGINE BOX**
The engine room bulkhead is full beam, laminated into the hullsides and cushioned by 1-inch thick acoustic foam to trap and absorb sound at its source.

**TUNED TRANSOM®**
When the transom vibrates, it sends sound throughout the boat. Tuned Transom from Omni Products, Inc., dampens vibration and noise by absorbing energy before it can travel. Neoprene isolators absorb vibration and inhibit noise, buffering between fuel tanks and brackets.

**GASKET SEALING**
Closed-cell compressible foam provides an NVH barrier in openings. Window frames, hatches and doors are sealed with rubber gaskets. Heavy-duty magnets, latches and bumpers further tighten closing compartments.

**ACOUSTIC BAFFLING MATERIALS**
NORSEAL® tape is applied to bed screws between the deck and rubrail, eliminating space sound waves need to travel. Neoprene isolators absorb vibration and inhibit noise, buffering between fuel tanks and brackets.

**THE RESULTS:**
Initial tests saw up to a 50 percent reduction in NVH.

**DECIBEL COMPARISON AT FULL CRUISING SPEED:**
Baseline Boat Average: 86.2—Roughly as loud as a lawn mower from 15 meters away
Quiet Ride Average: 79.4—Roughly as loud as the inside of a car at 65 mph

*A 6 decibel decrease means half the amplitude

One of the primary benefits of a new boat purchase is the freedom to relax, to put aside worry and focus on savoring the well-lived life on the water. Accordingly, Sea Ray is proud to offer a stellar 5-year factory warranty*. This program, Sea Ray SURPA5S, provides 5 years of enhanced coverage on every new sport boat in the Sea Ray lineup. The end result? Exceptional peace of mind.

All 2020 gas-powered Sea Ray sport boat models (both sterndrive and outboard - excludes SLX 400 & SLX 400 OB) feature Sea Ray’s 5-year, bow-to-stern factory warranty on the boat and its components from defects in materials and workmanship. The engine is covered for the same 5-year period**. In addition to the 5-year bow-to-stern coverage, all sport boats also have a Limited Lifetime Structural Hull / Deck Warranty to Original Owner.

*Applies only to new 2015 - 2020 Sea Ray sport boats built in the USA or Mexico. See the Sea Ray Express Limited Warranty for complete details. Alternate engine terms apply to diesel-powered sport boats.

**Applies to 2016 model year and newer Sea Ray sport boats built in the USA or Mexico and sold in the USA or Canada. Limitations do apply. Contact engine manufacturer and Brunswick Product Protection Corporation for coverage details.
One of the primary benefits of a new boat purchase is the freedom to relax, to put aside worry and focus on savoring the well-lived life on the water. Accordingly, Sea Ray is proud to offer a stellar 3-year factory warranty*. This program, Sea Ray SENTIN3L, provides 3 years of enhanced coverage on every new SLX 400 / SLX 400 OB in the lineup. The end result? Exceptional peace of mind.

All 2020 Sea Ray SLX 400s feature Sea Ray’s 3-year, bow-to-stern factory warranty on the boat and its components from defects in materials and workmanship. Additionally, gas engines are covered by a 5-year warranty**, while diesel engines receive the coverage defined by their manufacturer. Finally, beyond the 3-year bow-to-stern coverage, all SLX 400 & SLX 400 OBs also have a 10-year Limited Structural Hull / Deck Warranty to Original Owner.

*Applies only to new 2019 - 2020 Sea Ray SLX 400 & SLX 400 OBs built in the USA or Mexico. See the Sea Ray Express Limited Warranty for complete details. Alternate engine terms apply to diesel-powered SLX 400s.
